

HEALTHCARE & PHARMACEUTICALS

Hospitals, pharmaceuticals manufacturing, and other healthcare facilities require highly effective and environmentally sensitive integrated pest management (IPM) programs that can meet extensive regulatory restrictions in these facilities.

Pest management in healthcare requires a thorough understanding of the unique standards including ISO 9001, HACCP protocols and other federal, state, and local regulations.

-  Rodent Exclusion & Trapping
-  Assigned Account Manager
-  Quality Assurance Audits
-  "Green Certified" Service Professionals •
-  Rapid Response to Service Calls
-  24 Hour Emergency Response Line

Green Pro Certified

Abra Kadabra Environmental Services is proud to be GreenPro-certified by the National Pest Management Association as an environmentally-responsible business. We use a multifaceted approach to preventing and solving pest problems with the lowest environmental impact techniques and product selection practical. Environmentally responsible pest management is not necessarily more expensive, but it does require our technicians to have greater knowledge and skills, requires a better decision-making process than otherwise would be used, and should ultimately reduce the use of pesticide.

IPM Program includes:

- ☑ Inspection
- ☑ Sanitation
- ☑ Mechanical control
- ☑ Exclusion
- ☑ Cultural control
- ☑ Biological control
- ☑ Ongoing evaluation
- ☑ Least-toxic materials, as required when
- ☑ other alternatives have been explored

Integrated Pest Management

Abra Kadabra's Integrated Pest Management (IPM) services for LEED Certified Buildings.

Abra Kadabra's IPM service approach supports the following Leadership in Energy and Environmental Design (LEED) credit categories:

- ☑ Indoor Environmental Quality, EQ Credit: 3.9 Indoor Pest Management
- ☑ Sustainable Sites, SS Credit 3: Integrated Pest Management, Erosion Control, and Landscape Management Plan (This category refers to outdoor integrated pest management).
